ORIGINAL

WVFRP005

SUBJECT: SPCC PRE-INSPECTION INFORMATION CRITERIA

FROM: target/contact: Eduardo Rovira

TO: Regina A. Starkey, SPCC Coordinator (3HS32)

Tentative Inspection Date: November 15, 1999

The following information pertains to the target facility in preparation to conduct an SPCC inspection and/or review the SPCC Plan:

TARGET FACILITY LOCATION: FRP # WV-FRP-005
NAME Etowah Terminal
ADDRESS 1015 Baslow Dr.
CITY Charleston COUNTY Kanawha STATE WV ZIP 25311

OWNER/OPERATOR INFORMATION:
NAME Pennzoil Company
ADDRESS _____
CITY _____ COUNTY _____ STATE _____ ZIP _____

INITIAL TARGET SPECIFICATIONS:
OSC EMER RESP _____ OSC Field Observation _____ OSC Geographical _____ Spill History _____
Federal/State Request _____ FRP Facility ☒ Geographic/Multi-Media Enforce Initiative _____
TAT Conflict of Interest Yes _____ or No _____

TARGET BACKGROUND INVESTIGATION (contacts):
incident notification reports _____ (RRC) prior SPCC inspections _____ (SPCC Coord)
prior 311 violations _____ (Oil Enf Coord) chemical safety audit _____ (3HW33)
miscellaneous contacts as applicable: NPDES _____ UIC _____ RCRA _____ UST/LUST _____ OCI _____
ORC _____ FED FAC COORD _____ STATE _____ USCG _____ OTHER _____

COMMENTS: _____

I acknowledge receipt of Pre-inspection information and assign case number as follows:

SPCC Case Number WV-00-001

[pre-insp stardisc2/01-26-98]

Regina A. Starkey
Regina A. Starkey,
SPCC Coordinator

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY - REGION III

1650 Arch Street
Philadelphia, Pennsylvania 19103-2029

ACKNOWLEDGEMENT AND RECORD OF SPCC/FRP INSPECTION

SPCC CASE NUMBER: WV-00-001 FRP REGIONAL ID#: WV-FRP-005 DATE: 11/15/99

TO: Regina A. Starkey, SPCC Coordinator (3HS32)
CC: Linda J. Ziegler, FRP Coordinator (3HS32) (only if FRP applicable)

Inspector's Printed Name/Signature:	<u>Regina A. Starkey</u>		
Inspection Team Members:	<u>Regina / Wilson</u>		
Name/Location of Facility:	<u>Pennzoil - Quaker State</u>		
Address:	<u>1015 Baulow Dr</u>		
City:	County:	State:	Zip:
<u>Charleston</u>	<u>Kanawha</u>	<u>WV</u>	<u>25311</u>
Facility Contact/Title:	<u>John L. Hutchinson / Terminal Manager</u>		
Telephone Number:	<u>(304) 342-8161</u>		
Name of Owner/Operator:	<u>Pennzoil Products Company</u>		
Address:	<u>P.O. Box 2967</u>		
City:	State:	Zip:	
<u>Houston</u>	<u>TX</u>	<u>77252</u>	
Telephone Number:	<u>(713) 546-4209</u>		
** See pages 10 to 11 for FRP only information			
Synopsis of business operations:	<u>Bulk Oil Storage / Petroleum Distribution Terminal</u>		
Route of entry and estimated distance to waterway:	<u>On the Elk River</u>		
<u>(less than 1/4 mi)</u>			
Acknowledgement:			
I acknowledge that an SPCC/FRP inspection of this facility was conducted on the <u>15th</u> day of <u>November</u> , 19 <u>99</u> .			
Facility Representative Printed Name/Signature:	<u>John L. Hutchinson</u>		

NOTE: During this inspection the owner/operator of the facility was asked to provide an extra copy of the SPCC Plan, which will be submitted with this report to the SPCC Coordinator. An extra copy of the SPCC Plan was provided to the inspector (Y/N). If no, the owner/operator of the facility has been asked to send a copy of the SPCC Plan, if available, via certified mail, return receipt requested, within 14 days of the date of this inspection to the SPCC Coordinator (mail code 3HS32) at the address on this letterhead (Y/N).

Type of Facility (check all applicable descriptions):

- | | |
|--|--|
| <input checked="" type="checkbox"/> onshore | <input checked="" type="checkbox"/> commercial |
| <input type="checkbox"/> offshore | <input type="checkbox"/> agricultural |
| <input type="checkbox"/> oil well drilling | <input type="checkbox"/> public |
| <input type="checkbox"/> oil production | <input type="checkbox"/> waste treatment |
| <input type="checkbox"/> oil refining | <input checked="" type="checkbox"/> loading racks |
| <input checked="" type="checkbox"/> oil storage | <input type="checkbox"/> vehicles/rail cars (in-facility) |
| <input type="checkbox"/> industrial | <input type="checkbox"/> pipelines (in-facility) |
| <input type="checkbox"/> transformers/oil-filled equipment | <input checked="" type="checkbox"/> oil drum storage areas |

Date of facility start operations:

1930's

Date facility first required plan:

1974

Oil storage capacity aboveground:

6 millions

gallons

Oil storage capacity underground:

N/A

gallons

SPCC Plan prepared:

yes

** FRP Plan Prepared:

yes

SPCC Plan available for review:

yes

** FRP Plan Available:

yes

Facility normally attended at least 8 hours:

24/7 7-3

SPCC Plan Certified (seal affixed):

yes

Date Certified:

6/26/95

Name of Engineer:

William L. Buckingham

License Number:

10417

State:

WV

SPCC Plan reviewed every three years:

Record of SPCC Plan review available:

Date(s) of Review(s):

Spill of more than 1000 gallons in past 12 months:

No

If yes, date of spill:

Was Plan submitted per 40 CFR 112.4:

Two spills of harmful quantity in past 12 months:

No

If yes, dates of spills:

Was Plan submitted per 40 CFR 112.4:

Has there been a change in facility design, construction, operation, maintenance which could affect the facility's potential for discharge? If so, describe:

Date of Latest Change:

Date Plan Amended:

The following information directly reflects the requirements of 40 CFR 112 as applicable to the facility inspected.

Facility Drainage, Onshore (excluding production facilities) [40CFR112.7(e)1]:

- | | | | |
|----|--|-------|-------------------------------------|
| a. | from diked storage areas via valves: | (i) | <input checked="" type="checkbox"/> |
| | valves manually operated: | (ii) | <input checked="" type="checkbox"/> |
| b. | from diked storage areas via pumps or ejectors: | (i) | <input checked="" type="checkbox"/> |
| | pumps or ejectors manually operated: | (ii) | <input checked="" type="checkbox"/> |
| c. | storm water inspected prior to discharge: <i>goes to an o/w</i> | (ii) | <input type="checkbox"/> |
| d. | from undiked areas into catchment basins: | (iii) | <input type="checkbox"/> |
| e. | if dikes or catchment basins are not utilized, is there a diversion system to return spills to the facility: | (iv) | <input type="checkbox"/> |
| f. | is drainage water treated at the facility: | (v) | <input checked="" type="checkbox"/> |

Inspector's comments on Facility Drainage, Onshore (excluding production facilities), based upon inspection:

Bulk Storage Tanks, Onshore (excluding production facilities) [40CFR112.7(e)2]:

- | | | | |
|----|--|----------|-------------------------------------|
| a. | Material and construction of tanks compatible to the oil stored and the conditions of storage: | (i) | <input checked="" type="checkbox"/> |
| b. | All Tank installations have secondary containment: | (ii) | <input checked="" type="checkbox"/> |
| c. | Secondary containment appears to be adequate: | (ii) | <input checked="" type="checkbox"/> |
| d. | Diked areas are sufficiently impervious: | (ii) | <input checked="" type="checkbox"/> |
| e. | Drainage from diked areas to on-site treatment: | (iii) | <input type="checkbox"/> |
| | If no, is the bypass valve normally sealed closed: | (iii)(A) | <input type="checkbox"/> |
| | Drainage from diked area is inspected: <i>goes to an o/w</i> | (iii)(B) | <input type="checkbox"/> |
| | Bypass valve is opened and resealed properly: | (iii)(C) | <input type="checkbox"/> |
| | Adequate records of dike drainage are maintained: | (iii)(D) | <input type="checkbox"/> |
| f. | Underground tanks at this facility: | (iv) | <input checked="" type="checkbox"/> |
| | Protected from corrosion: | (iv) | <input checked="" type="checkbox"/> |
| | Pressure tested periodically: | (iv) | <input checked="" type="checkbox"/> |
| g. | Partially buried tanks at this facility: | (v) | <input checked="" type="checkbox"/> |
| | Buried sections protected from corrosion: | (v) | <input checked="" type="checkbox"/> |

- h. Aboveground tanks at this facility:(vi) ☐ Y
- Subject to periodic integrity testing:(vi) ☐ Y
- Records of inspections maintained:40CFR112.7(e)8 ☐ Y
- Internal heating coils utilized:(vii) ☐ N
- If yes, steam return/exhaust monitored:(vii) ☐ N
- External heating system utilized:(vii) ☐ N
- Tanks are "fail-safe" engineered:(viii) ☐ Y
- Audible high liquid level alarm:(viii)(A) ☐ Y
- Visual high liquid level alarm:(viii)(A) ☐ Y
- Automatic high liquid level pump cutoff:(viii)(B) ☐ Y
- Communications between gauger and pumping station:(viii)(C) ☐ Y
- System of determining liquid level in tanks such as
- sensing devises:(viii)(D) ☐ Y
- Direct vision gauges:(viii)(D) ☐ Y
- Sensing devises and/or gauges regularly tested:(viii)(E) ☐ Y
- i. Effluents discharges directly to navigable waters observed frequently
to detect oil spills:(ix) ☐ Y
- j. Causes of oil leaks resulting in accumulations of oil in diked areas are
promptly corrected:(x) ☐ Y
- k. Mobile or portable tanks at this facility:(xi) ☐ N
- If yes, are positioned properly:(xi) ☐ ↓
- A secondary means of containment is utilized:(xi) ☐ ↓

Inspector's comments on Bulk Storage Tanks, Onshore (excluding production facilities), based upon inspection:

Facility Transfer Operations, Pumping and In-Plant Processes, Onshore (excluding production facilities) [40CFR112.7(e)3]:

- a. Buried pipelines are corrosion protected:(i) ☐ Y
- b. Not-in-service pipelines are capped or blank-flanged, and marked as
their origin:(ii) ☐ Y
- c. Pipe supports are designed to minimize abrasion and corrosion, and allow
for expansion and contraction:(iii) ☐ Y
- d. Aboveground pipelines are inspected regularly:(iv) ☐ Y
- e. Periodic pressure testing is conducted:(iv) ☐ Y
- f. Vehicle traffic warned of aboveground pipelines:(v) ☐ Y

Inspector's comments on Facility Transfer Operations, Pumping and In-Plant Processes, Onshore (excluding production facilities), base upon inspection:

Facility Tank Car and Tank Truck Loading/Unloading Rack, Onshore [40CFR112.7(e)4]:

- a. Rack drainage flows to catchment basin:(ii) ☒ Y
- Or drainage flows to treatment system:(ii) ☒ Y
- Or secondary containment is used:(ii) ☒ Y
- b. Is a system used to prevent vehicular departure before complete disconnect from transfer lines:(iii) ☒ Y
- interlock warning lights:(iii) ☐
- physical barrier system:(iii) ☐
- warning signs:(iii) ☒ Y
- c. Vehicle inspection before departing facility:(iv) ☒ Y

Inspector's comments on Facility Tank Car and Tank Truck Loading/Unloading Rack, Onshore, based upon inspection:

Oil production Facilities, Onshore [40CFR112.7(e)5]:

- a. Drainage from secondary containment systems at tank batteries and central treatment stations are closed and sealed at all times except when rainwater is being drained: ☐
- b. Prior to drainage, accumulated oil on the rainwater is picked up and returned to storage or disposed of: ☐
- c. Field drainage ditches, road ditches, and oil traps, sumps or skimmers are regularly inspected for oil: ☐
- Accumulated oil is removed: ☐
- d. Aboveground tanks at this facility: ☐
- Material and construction are compatible with the oil stored and the conditions of storage: ☐
- Secondary means of containment appears adequate: ☐
- Tank inspections are conducted periodically: ☐
- By a competent person: ☐
- Includes tank foundation and supports: ☐
- Tank battery installations fail-safe engineered: ☐
- Adequate tank capacity to prevent tank overflow: ☐
- Overflow equalizing lines between tanks: ☐
- Vacuum protection to prevent tank collapse: ☐
- High level alarms: ☐
- e. Facility transfer operations at this facility: ☐
- Aboveground valves/pipelines examined periodically: ☐
- Brine disposal facilities examined often: ☐
- Flowline maintenance program established: ☐
- Records of inspection maintained: ☐

Inspector's comments on Oil Production Facilities, Onshore, based upon inspection:

Inspector's comments on Oil Drilling and Workover Facilities, Onshore, based upon inspection:

Inspections are documented and maintained:

[illegible]

Inspector's comments on Oil Drilling and Workover Facilities, Offshore, based upon inspection:

Inspection and Records [40CFR112.7(e)8]:

- a. Inspections required by 40 CFR 112 are in accordance with written procedures developed for the facility: ☒
- b. Written procedures and a record of inspections are signed by the appropriate supervisor or inspector: ☒
- c. Written procedures and a record of inspections are made part of the SPCC Plan: ☒
- d. Written procedures and a record of inspections are maintained for a period of 3 Years: ☒

Inspector's comments on Inspections and Records, based upon inspection:

Security (excluding oil production facilities) [40CFR112.7(e)9]:

- a. Facility is fully fenced: (i) ☒
- b. Entrance gates locked and/or guarded: (i) ☒
- c. Master flow and drain valves secured in closed position when in a non-operating or non-standby status: (ii) ☒
- d. Starter control on pumps locked in the "off" position or located at a site accessible only to authorized personnel when in a non-operating or non-standby status: (iii) ☒
- e. Loading/unloading connection of pipelines are capped or blank-flanged when not in service: (iv) ☒
- f. Facility lighting appears to be adequate to facilitate the discovery of spills during hours of darkness and to deter vandalism: (v) ☒

Inspector's comments on Security (excluding oil production facilities), based upon inspection:

Personnel Training and Spill Prevention Procedures [40CFR112.7(e)10]:

- a. Personnel properly instructed in spill prevention: (i) ☒
- b. Designated person accountable for spill prevention: (ii) ☒
- c. Spill prevention briefings scheduled periodically: ☒
Dates of Discharge Prevention Meetings: 3/19/98 3/22/99

Inspector's comments on Personnel Training and Spill Prevention Procedures, based upon inspection:

Aboveground Storage Tank and Appurtenances Inspection Checklist: [40CFR §112.7(e)]

1. Check Tanks for leaks, specifically looking for
 - a. Discolorations of tanks..... 2(vi) ☐
 - b. Corrosion..... 2(vi) ☐
 - c. Cracks..... 2(vi) ☐
 - d. Drip marks and stains..... 2(x) ☐
 - e. Puddles of stored material..... 2(x) ☐
 - f. Localized dead vegetation 2(x) ☐

2. Check Foundations for
 - a. Cracks 2(vi) ☐
 - b. Settling 2(vi) ☐
 - c. Gaps between tank and foundation 2(vi) ☐
 - d. Discoloration 2(vi) ☐
 - e. Puddles of stored material..... 2(x) ☐

3. Check pipes and valves for
 - a. Presence of stored material on valves 2(x) ☐
 - b. Evidence of leakage at joints and seams 2(x) ☐
 - c. Localized dead vegetation 2(x) ☐
 - d. Bowing of pipes between supports 3(iii) ☐
 - e. Droplets of stored material..... 3(iv) ☐
 - f. Discoloration 3(iv) ☐
 - g. Corrosion..... 3(iv) ☐

Inspector's comments on Aboveground Storage Tank and Appurtenances, based upon inspection:

Inspector's comments on Underground Storage Tank and Appurtenances, based upon inspection:

Record of SPCC/FRP Inspection/Plan Review

Secondary Containment Checklist: [40CFR §112.7(e)]

1. Secondary Containment (dike or berm system)
 - a. Drainage mechanism manually operated 1(ii)
 - b. Capacity appears adequate 2(ii)
 - c. Sufficiently impervious to stored materials 2(ii)
 - d. Standing water within dike or berm 2(ii)
 - e. Debris/vegetation within the dike or berm area 2(ii)
 - f. Erosion or corrosion of dike or berm 2(ii)
 - g. Presence of stored material within dike or berm 2(x)

2. Secondary Containment (other systems such as moat, catch-basin, pond, etc)
 - a. Capacity appears adequate 2(ii)
 - b. Drainage mechanism manually operated 2(ii)
 - c. Standing water within the secondary containment system 2(ii)
 - d. Debris/vegetation within the secondary containment system 2(ii)
 - e. Erosion or corrosion of the secondary containment system 2(ii)
 - f. Presence of stored material within secondary containment 2(x)

3. Secondary Containment (drainage systems)
 - a. Drainage adequate to return spilled material to facility 2

4. Secondary Containment (none or inadequate) 40CFR §112.7(d)
 - a. Demonstration of impracticability
 - b. Contingency Plan developed per 40 CFR 109
 - c. Written commitment

Inspector's comments on Secondary Containment, based upon inspection:

THIS FACILITY IS NOT SUBJECT TO FRP REGULATIONS

IS A COPY OF ATTACHMENT C-II FILLED OUT AND MAINTAINED WITH THE SPCC PLAN? IF NO PROVIDE A COPY AND REQUEST FILLED OUT FORM BE PROVIDED ALONG WITH THE SPCC PLAN.

THIS FACILITY IS SUBJECT TO FRP REGULATIONS BUT HAS NOT PROVIDED A COPY TO EPA REGION III

**** (THIS SECTION APPLIES TO FRPS ONLY)**

The following 3 lines to be filled out before on-site inspection:

FRP Regional ID #

Reviewer Name

Date of FRP Plan Review Checklist

The following records will be checked:

Personnel Response Training

Name/Position

Response Training/Date/No. of Hrs

Prevention Training/Date/No. of Hrs

Note: If appropriate, a copy will be photocopied during the inspection and noted comments.

Drills

QI Notification Drill Dates (Quarterly): 3/18 4/5 8/3 10/7/99

Facility Deployment Drill Dates (Semi-Annual): 6/16 10/1/99

OSRO Deployment Drill Dates (Annual):

Tabletop Drill Dates (Annual): 10/7/97 6/2/98 10/1/99

Unannounced Exercise Dates (Annual): 10/7/97 6/2/98 10/1/99

Response Equipment Inspection Dates (Monthly):

ATTACHMENT C-II (40 CFR Part 112 - FRP Final Rule p. 34105)

Certification of the Applicability of the Substantial Harm Criteria

Facility Name: _____

Facility Addresses: _____

1. Does the facility transfer oil over water to or from vessels and does the facility have a total oil storage capacity greater than or equal to 42,000 gallons?

Yes ☐No ☐

2. Does the facility have a total oil storage capacity greater than or equal to 1 million gallons and does the facility lack secondary containment that is sufficiently large to contain the capacity of the largest aboveground oil storage tank plus sufficient freeboard to allow for precipitation within any aboveground oil storage tank area?

Yes ☐No ☐

3. Does the facility have a total oil storage capacity greater than or equal to 1 million gallons and is the facility located at a distance (as calculated using the appropriate formula in Attachment C-III to this appendix or a comparable formula¹) such as that a discharge from the facility could cause injury to fish and wildlife and sensitive environments? For further description of fish and wildlife and sensitive environments, see Appendices I, II, and III to DOC/NOAA's "Guidance for Facility and Vessel Response Plans: Fish and Wildlife and Sensitive Environments" (see Appendix E to this part, section 10, for availability) and the applicable Area Contingency Plan.

Yes ☐No ☐

4. Does the facility have a total oil storage capacity greater than or equal to 1 million gallons and is the facility located at a distance (as calculated using the appropriate formula in Attachment C-III to this appendix or a comparable formula¹) such that a discharge from the facility would shut down a public drinking water intake²?

Yes ☐No ☐

5. Does the facility have a total oil storage capacity greater than or equal to 1 million gallons and has the facility experienced a reportable oil spill in an amount greater than or equal to 10,000 gallons within the last 5 years?

Yes ☐No ☐**Certification**

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this document, and that based on my inquiry of those individuals responsible for obtaining this information, I believe that the submitted information is true, accurate, and complete.

Signature: _____

Name (Please type or print): _____

Title: _____

Date: _____

¹ If a comparable formula is used, documentation of the reliability and analytical soundness of the comparable formula must be attached to this form.

² For the purposes of 40 CFR part 112, public drinking water intakes are analogous to public water systems as described at 40 CFR 143.2(c).

RESPONSE EQUIPMENT INSPECTION LOG	
Equipment	Comments

Note: These two logs are available in full-page format (additional copies are available at the office). If additional forms are needed they should be attached at the end of the inspection form and so noted on this page.

FACILITY RESPONSE PLAN INTERVIEW CHECKLIST

FACILITY

Hours of Operations. ☐ 8 hrs ☐ 10 hrs ☐ 12 hrs ☒ 24 hrs
Work Week ☐ weekend. ☐ flex week ☐ 5-day ☒ 7-day

SCENARIO

Demonstrates knowledge of the plan:

☐ Plan ☒ EPA

DISCOVERY

Means of spill detection:

Facility Personnel ☐ none ☐ weekly ☒ daily ☐ hourly
Automatic ☐ ☐ audio ☒ visual
Manual ☐ ☐ audio ☐ visual
Offsite ☐ ☐ residential ☐ commercial

ASSESSMENT (QI Duties)

Exhibits knowledge of the following:

☒ amount ☐ distance (downgradient water) ☒ time
☒ directions ☐ material ☒ sensitive/vulnerable areas
☐ hazards imposed ☐ source ☐ cause (& chain reaction)
☐ topography (pathway) ☐ site conditions (soils impact) ☐ resources deployed (response & removal actions)
☐ climate conditions

NOTIFICATIONS

(when, where, what, how much)

☒ Internal (company)
(communication equip)☒ External (agencies)☒ Contractor**MITIGATION**

Exhibits knowledge of the following:

Resources ☒ personnel ☒ contractor

Mechanical ☒ boom (size/amount) ☐ skimmers ☐ vacuum trucks
☐ tractors ☐ boats ☐ sorbents (type/year)
☐ hand tools ☐ equip checklist & test logs
☐ operational status ☐ fire fighting equip

Chemical/Biological ☐ knowledge of products ☐ nature of application
☐ knowledge of authorizations ☐ operational status

Burning/Other mitigating devices
☐ knowledge of products ☐ nature of application ☐ knowledge of authorizations

TEMPORARY STORAGE

Have plans for the following:

	drums	tanks	pits	n/a
<input type="checkbox"/> on site	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/> off site	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input checked="" type="checkbox"/> contractor	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/> regulatory requirements	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

TREATMENT

Exhibiting knowledge of the following:

☐ reclamation☐ land farming**DISPOSAL**

Exhibits knowledge of the following:

☐ disposal plans☐ waste streams☐ waste facilities☐ regulatory requirements**ROLES AND RESPONSIBILITIES**

Exhibiting knowledge of the following:

☒ Q.L.☒ local☒ state☒ federal☒ media**COMMAND & CONTROL (ICS & USC)**

Familiarity with the following:

☒ logistics☒ operations☐ planning☒ financial☒ internal☒ external☒ contractor**COMMAND CENTER**

Planning for or having knowledge of the following:

☐ accommodations☒ communications

TRAINING

Exhibiting knowledge in the following:

- ☒ planning ☐ spill response ☐ safety ☒ prevention ☒ equipment
☒ training logs

EXERCISING

Has participated in or has knowledge of:

- ☒ PREP ☐ other (please specify) _____ ☐ approved by RA
☐ Schedule ☐ Activity ☒ drill/exercise logs
☐ Based on training & drills/exercises, is the facility able to implement plan?

EVACUATION

Exhibits knowledge of or participated in:

- | | audio | visual |
|--|-------------------------------------|-------------------------------------|
| <input checked="" type="checkbox"/> internal | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> |
| <input type="checkbox"/> external | <input type="checkbox"/> | <input type="checkbox"/> |
- Take note of following:
- | | | |
|---|---|---|
| <input type="checkbox"/> spill hazards | <input type="checkbox"/> check in area | <input type="checkbox"/> arrival routes of responders |
| <input type="checkbox"/> prevailing winds | <input type="checkbox"/> command center | <input type="checkbox"/> evacuation route (& alternate) |
| <input type="checkbox"/> alarm locations | <input type="checkbox"/> facility shelter | <input type="checkbox"/> community evacuation |

GENERAL COMMENTS
